

Tomal[®] Big Bag emptying unit

Emptying made simple!

This emptying unit is used to accommodate and empty Big Bags weighing up to 1,000 kg. The Big Bags are suspended in the frame with the aid of a lifting cross bar. The 30-litre powder storage tank is used to transfer the powder into a feed unit.

Technical Details

- Frame 1,570 x 1,300 x 2,540 mm (WxLxH). The height can be adjusted up to 2,040 mm
- Powder storage tank with powder re-filling probe, 30-litre content
- Discharge funnels available for various bag sizes
- Tomal[®] multi-screw feeder for reliable emptying of Big Bags and accurate metering
- Pyramid blades for disposable bags, alternatively flap for use with reusable bags
- Rubber seal for minimising dust
- Vibrator as discharge aid, controlled by the empty level signaller under the drain
- Lifting equipment comprising lifting cross bar for forklift, alternatively manual or electrical travelling crane
- Hygienic Big Bag emptying for dust-free operation
- Dust extraction filter
- Complete electrical system
